FUTUJARA  
hybrid fujara, 5 instruments in one!!!

Â

Â

The Futujara is our top model which was made in collaboration with

[Max Brumberg.](#)

It has unique possibility to connect 4 different tubes in 4 keys: C,D, A and G, and if you disconnect all playing tubes you get overtone flute in A. But futujara is not only multi-key set of fujara, it also gives you amazing possibility to play in totally different way! The hose attached to futujara makes it really maneuverable and you can use technique which is used in playing on [kalyuka](#), russian overtone flute (see the video for details).

Video: how to assemble Futujara and take care for it:

Â

**Some important details for the care and fine tuning of your futujara:**

- - There is a little piece above the window on the top of your futujara, you can shift it up and down. Use this part to fine tune the sound of your futujara, you are going to see, it changes a lot.
- - After playing you should also take off the hose or the little mouthpiece depending on what you used, to let them dry.

Hello Nadishana, I received my new Futujara a couple days ago and I have really enjoyed playing it! It seems like every time I get home I want to break it out and I end up playing until I can no more. I really like how light weight it is and the sound is great. I am planning to buy a microphone for it so I can do some jamming with my roommates. Thanks again for all of your help! Christopher Tanner
