Bamboo Overtone Flute

€25.00

Overtone flute made of bamboo.

Â

The technique of playing and sound properties of this flute is very similar to slovak **koncovka**. And if you love russian [kalyuka](#), but it's too hard for you to learn how to make a sound, then it's the option for you.

- Recommended for professionals for the stage performans and studio work. Have sharp penetrating sound full of hi harmonics.
- Recommended for the beginners: since the flute has the fipple you can get the sound right away and achieve quite impressive results pretty fast. Very easy to play!
- Very affordable price, [sets](#) and single instruments available.

Optionally you can order this flute with the **bindings (not available anymore)**. The photos above shows flutes with bindings (the thread on the both ends of the flute). This particular bamboo is not prone to cracking and we have had just one case in 4 years when flute cracked in tough climate. Although if you have a harsh himidity changes in a place where you live we'd recommend you to order this flute with the bindings. Of course you always can do bindings yourself also.
