incl. adjusting pump
diameter 45 cm, goat skin, weight 820 gram
powerful sound

Human visual sense is adopted to the human environment but if you are going to be able to see in the world of spirits you might need another sight ability. So says kuzhebarian folk belief. And the point is not in your disability to see anything in the spirits world, but in the sense to understand what you have seen, because in the world of spirits rules a different interpretation system. Kuzhebarian tales say that the Goor-Bird can bring this special sense to humans. To get it one just should go to the sacred Gurgang Tree to spend the night over there and to play a special song on the jaw harp during the twilight hour.

How pneumatic tuning system works (by [David Kuckhermann](#)) :

Some infos regarding henna paint:

Since ancient times henna had been proved as the best material for drum skin decoration.

The reasons for that are:

1. henna don t influence the sound of the drum, don t damp it, because the paint is made with henna paste, which will be removed after 48 hours out of the skin, leaving a trace. Tanin - the natural color inside henna will be absorbed by the drum skin, the process is similar to a soft etching.
2. lifetime of henna paint is as long as of your drum
3. henna paint doesn t fade with the time, in opposite, with the time the color get darker. When the drum is played with hands, the fat of the hands get in contact with henna trace and the color get even more darker.
4. because it is a kind if etching, the henna paint never smears or runs.
