FUTUJARA

hybrid fujara, 5 instruments in one!!!

Â

The Futujara is our top model which was made in collaboration with

[Max Brumberg](#).

It has unique possibility to connect 4 different tubes in 4 keys: C,D, A
and G, and if you disconnect all playing tubes you get overtone flute
in A. But futujara is not only multi-key set of fujara, it also gives you

amazing possibility to play in totally different way! The hose attached to futujara makes it really maneuverable and you can use technique which is used in playing on [kalyuka](#), russian overtone flute (see the video for details).

Some important details for the care and fine tuning of your futujara:

- - There is a little piece above the window on the top of your futujara, you can shift it up and down. Use this part to fine tune the sound of your futujara, you are going to see, it changes a lot.
- - After playing you should also take off the hose or the little mouthpiece depending on what you used, to let them dry.

Package received yesterday. Thank you. Instrument is very playable. I have played the pennywhistle for many years and have recently started playing the Irish flute and shakuhachi. I will find the fujara (futujara) to be an interesting addition to my repertoire. I have also made and played several koncovkas in different keys. The overtone flute is my discovery of the year. I first heard of the Fujara from a friend returning with a shepherds whistle for me from Slovakia. I particularly enjoy the trance like meditative qualities the Futujara evokes while I am playing it. I could not put it down for long last night. Cheers, Jon Rodgers
